

# PCF Platform

For the Chemical Industry

**Atos**

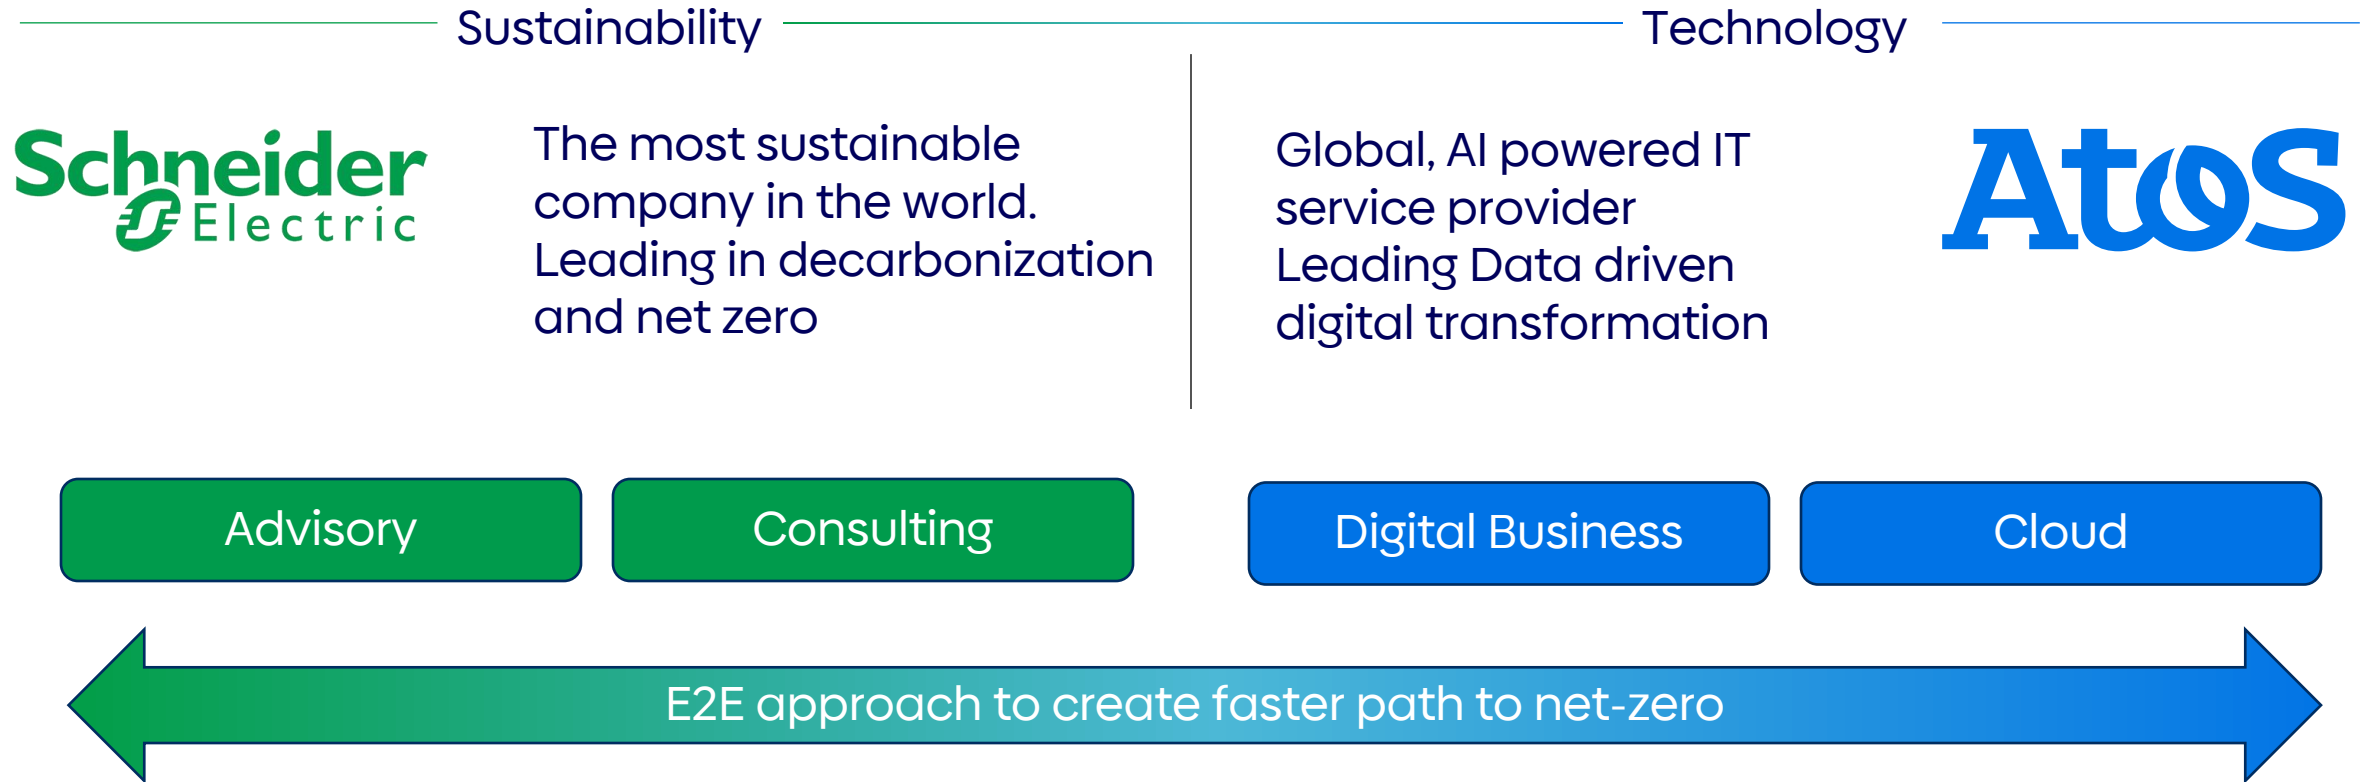

A dark blue curved graphic element, resembling a thick arc or a stylized 'C' shape, positioned on the left side of the slide.

With PCF Platform,  
we expand the possibilities of customers'  
product data,  
to make the carbon emissions of their  
products transparent  
automated and at scale.

# To act for a net-zero and sustainable digital world

You need to find a partner with the right competencies

# A Snapshot

BASF provides digital solution & Tfs methodology for calculating the Product Carbon Footprint

Atos is the partner for the development & distribution of a software platform based on this methodology to make the PCF Calculations approach available to the industry

State of the Art & Industry proven

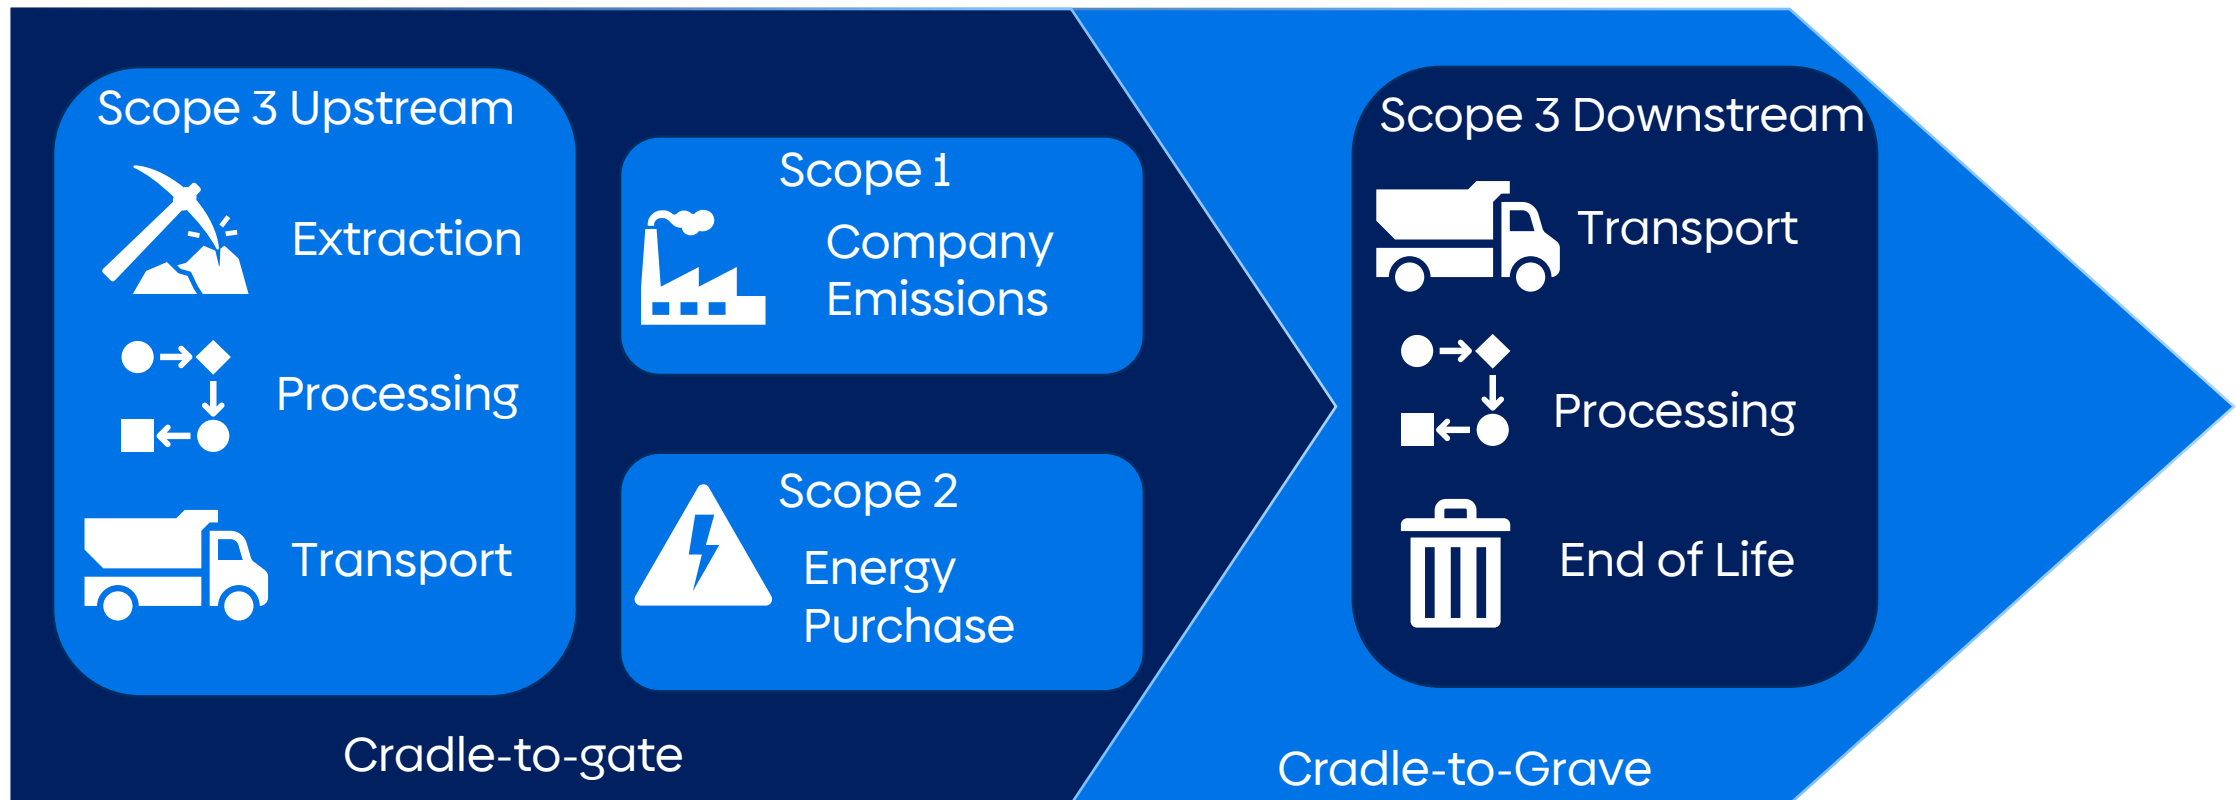

Be a part of setting a global standard of PCF calculations in the chemical and process industries

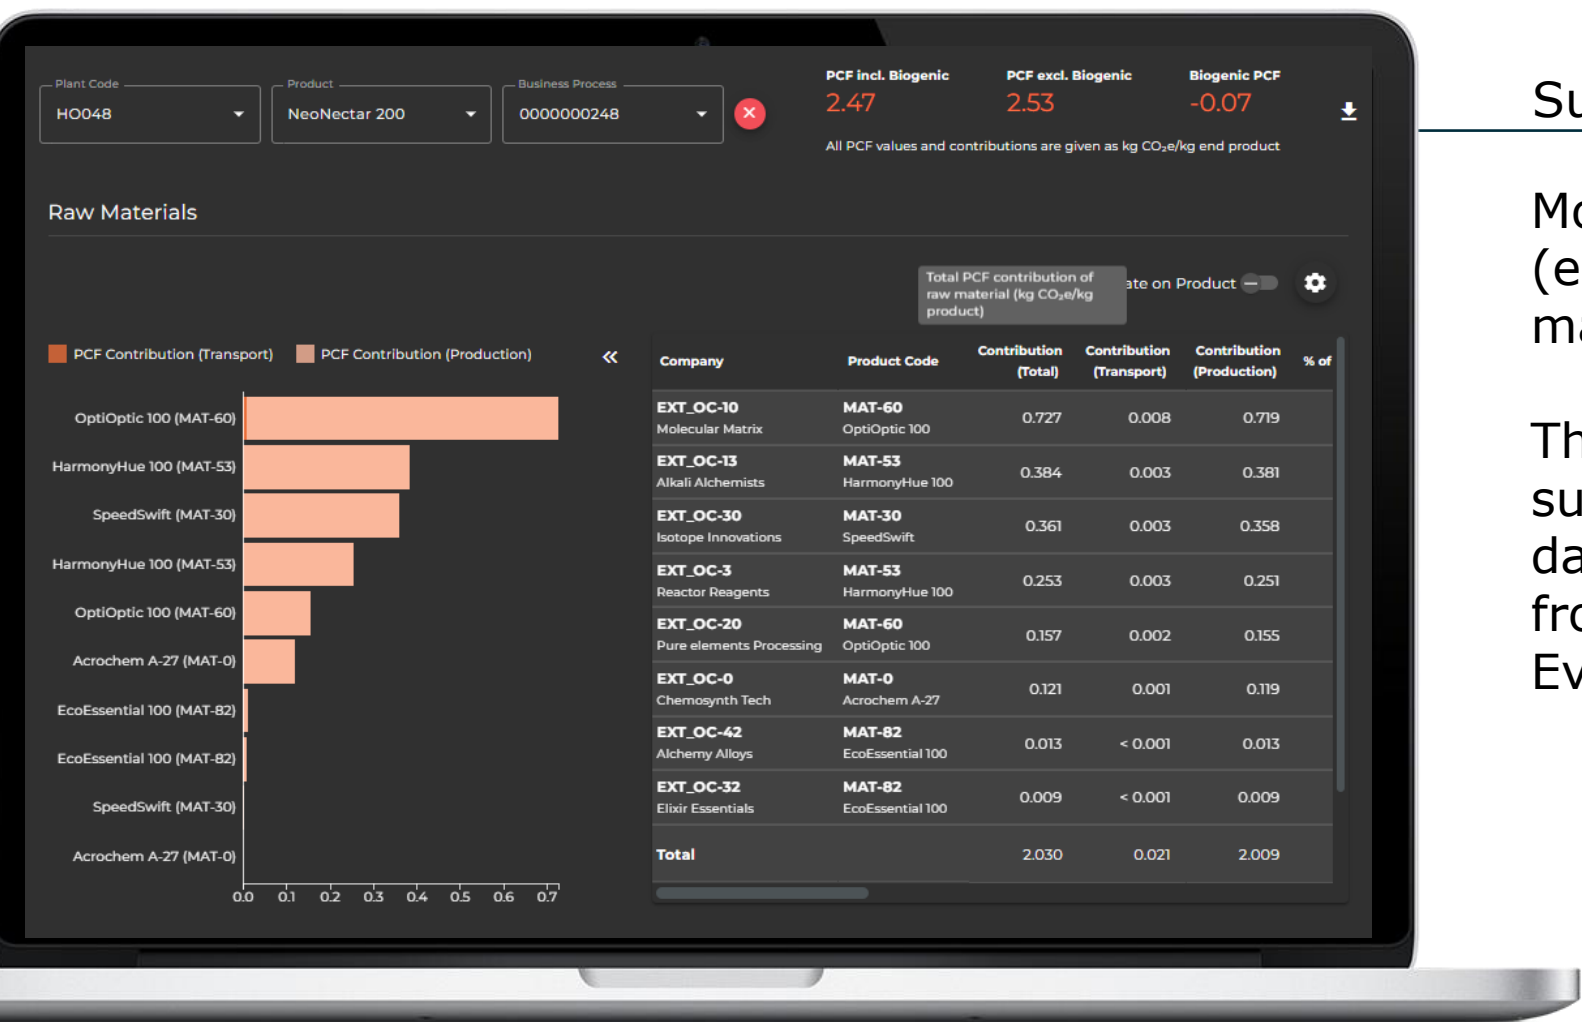

Automate your PCF calculation & Expand the possibilities of your Product data, with transparency of your carbon emission

Increase the USP of your products

# PCFs summarize the specific amount of greenhouse gas (GHG) emissions associated with a product throughout its life cycle

# Increase accuracy using best available data

## Supplier specific data

Most PCFs rely on secondary data (e.g. LCA databases) for raw material emissions

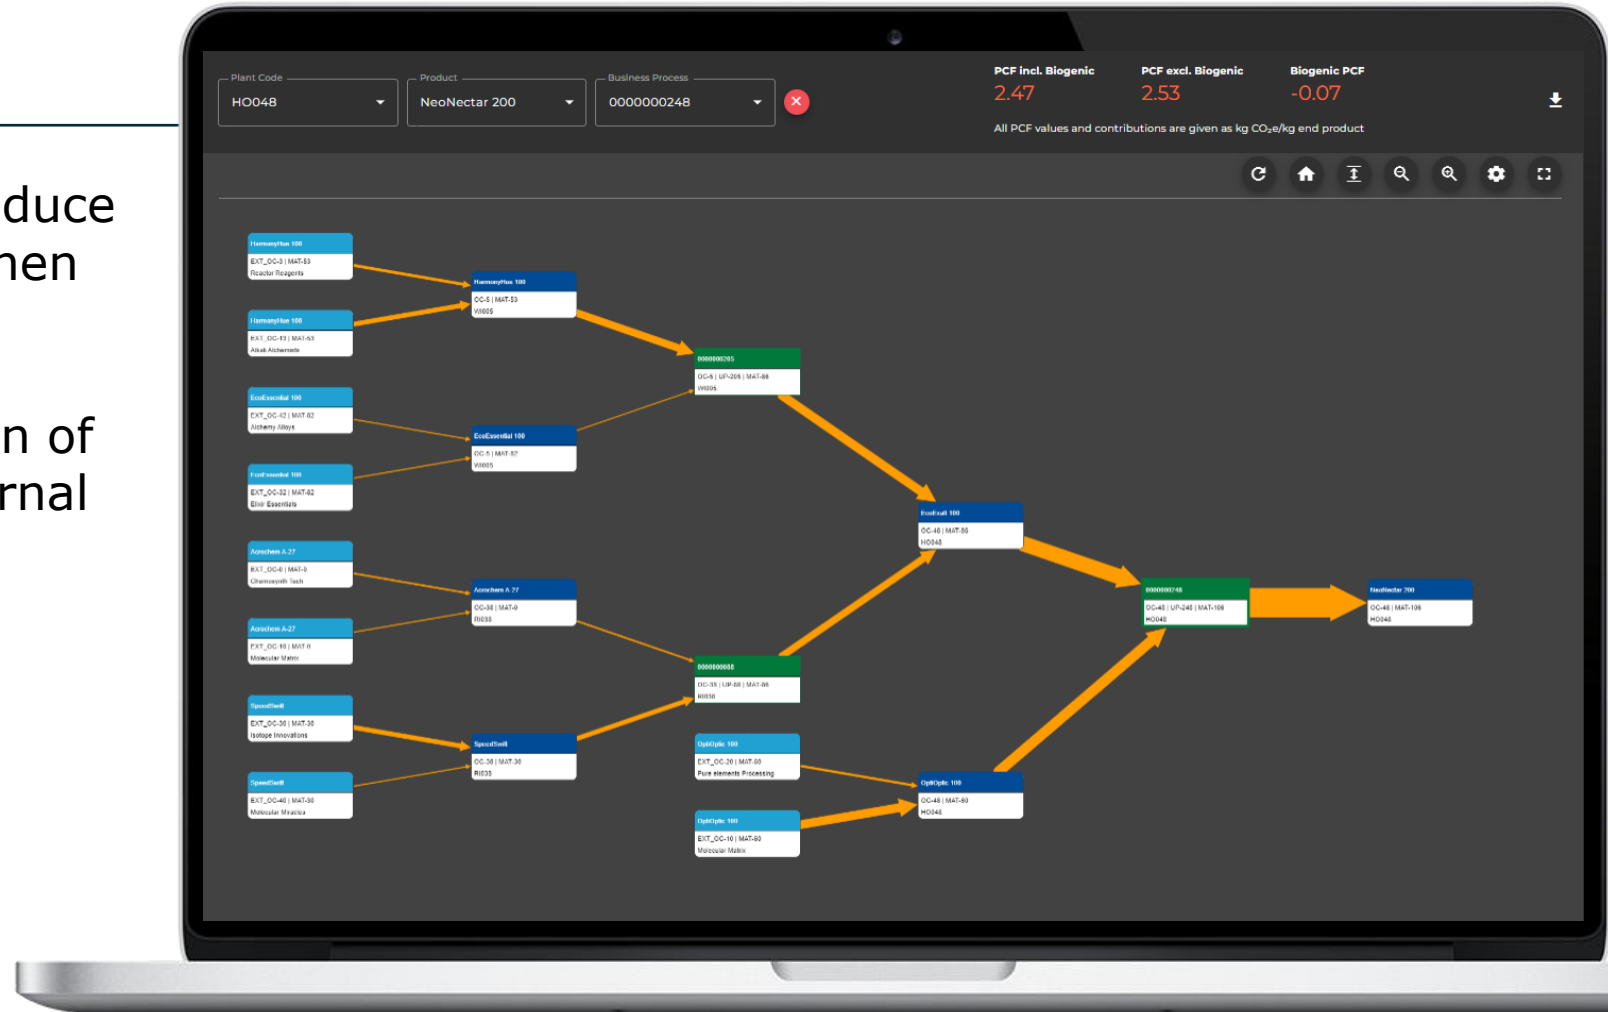

The PCF Platform allows to use both, supplier specific and secondary PCF data. For example secondary data from ecoinvent can be sourced by Eviden.

# Gain Transparency with valuable insights

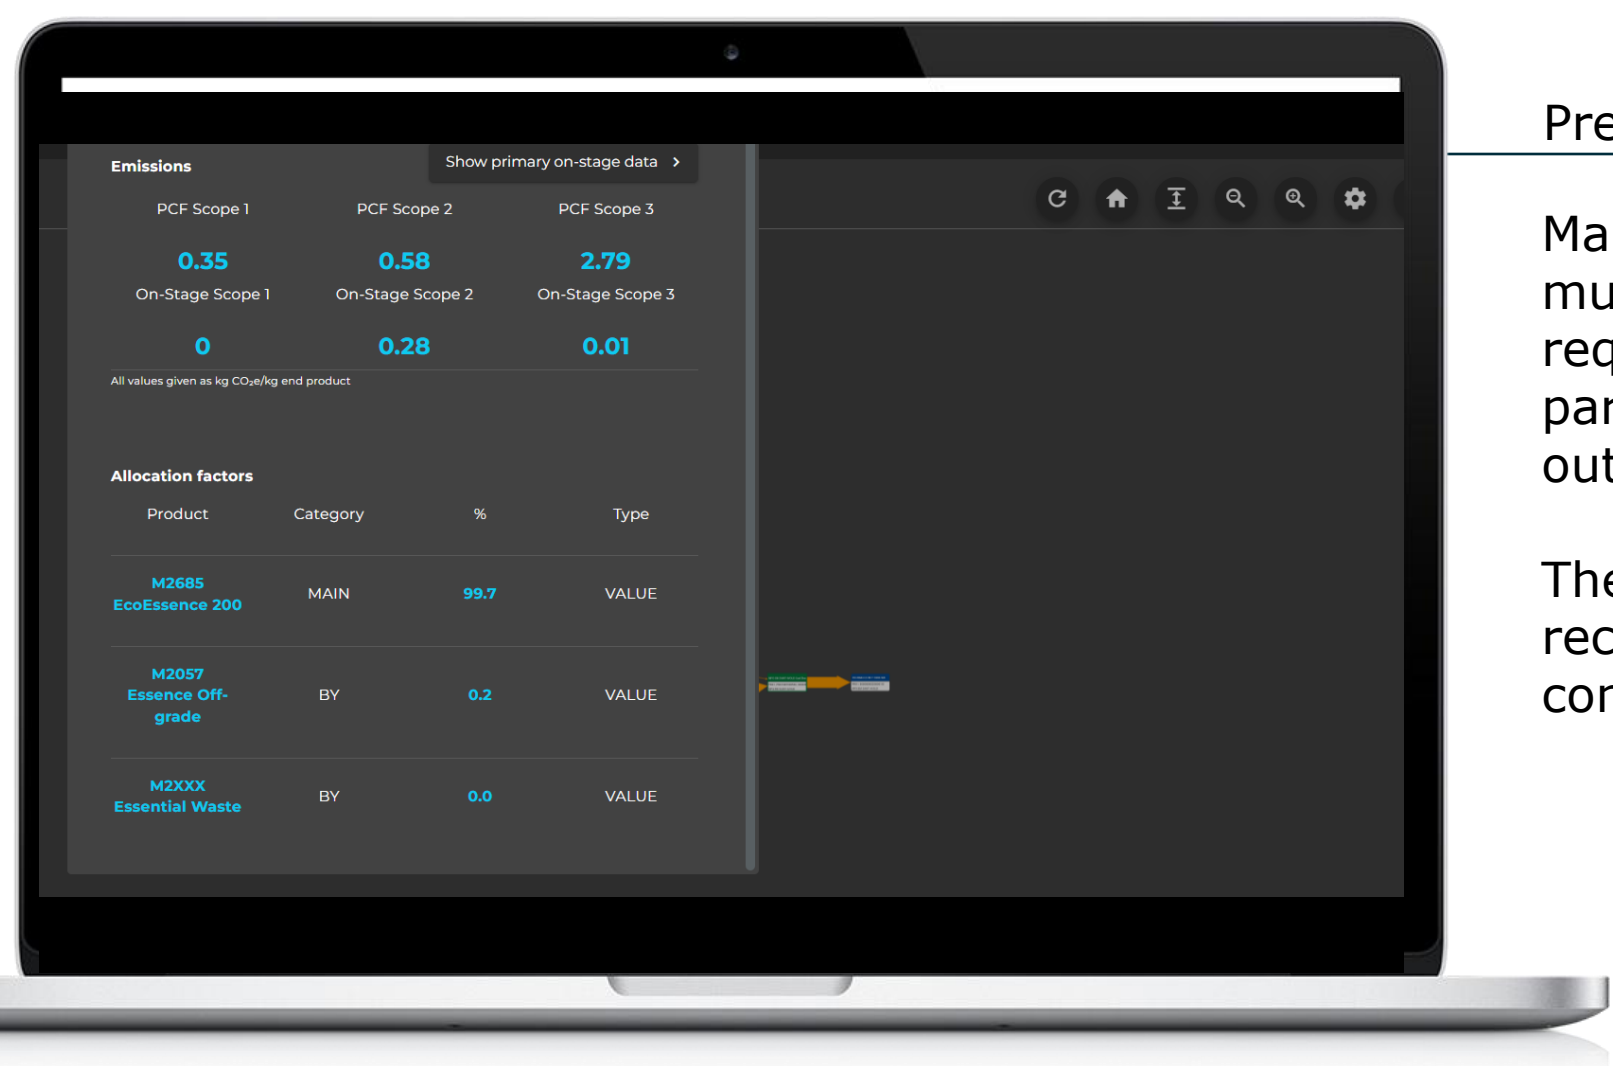

## Internal supply chain

Chemicals companies often produce themselves products that are then used for other products.

The platform enables calculation of PCFs for products with an “internal supply chain” consistently and transparently.

# Consider by-products with standardized allocation rules

## Pre-defined allocation

Many chemical processes create multiple outputs. Within LCA this requires allocation. Allocation is partitioning emissions from a multi-output process to individual outputs.

The PCF platform provides a recognized allocation hierarchy consistent across the portfolio.

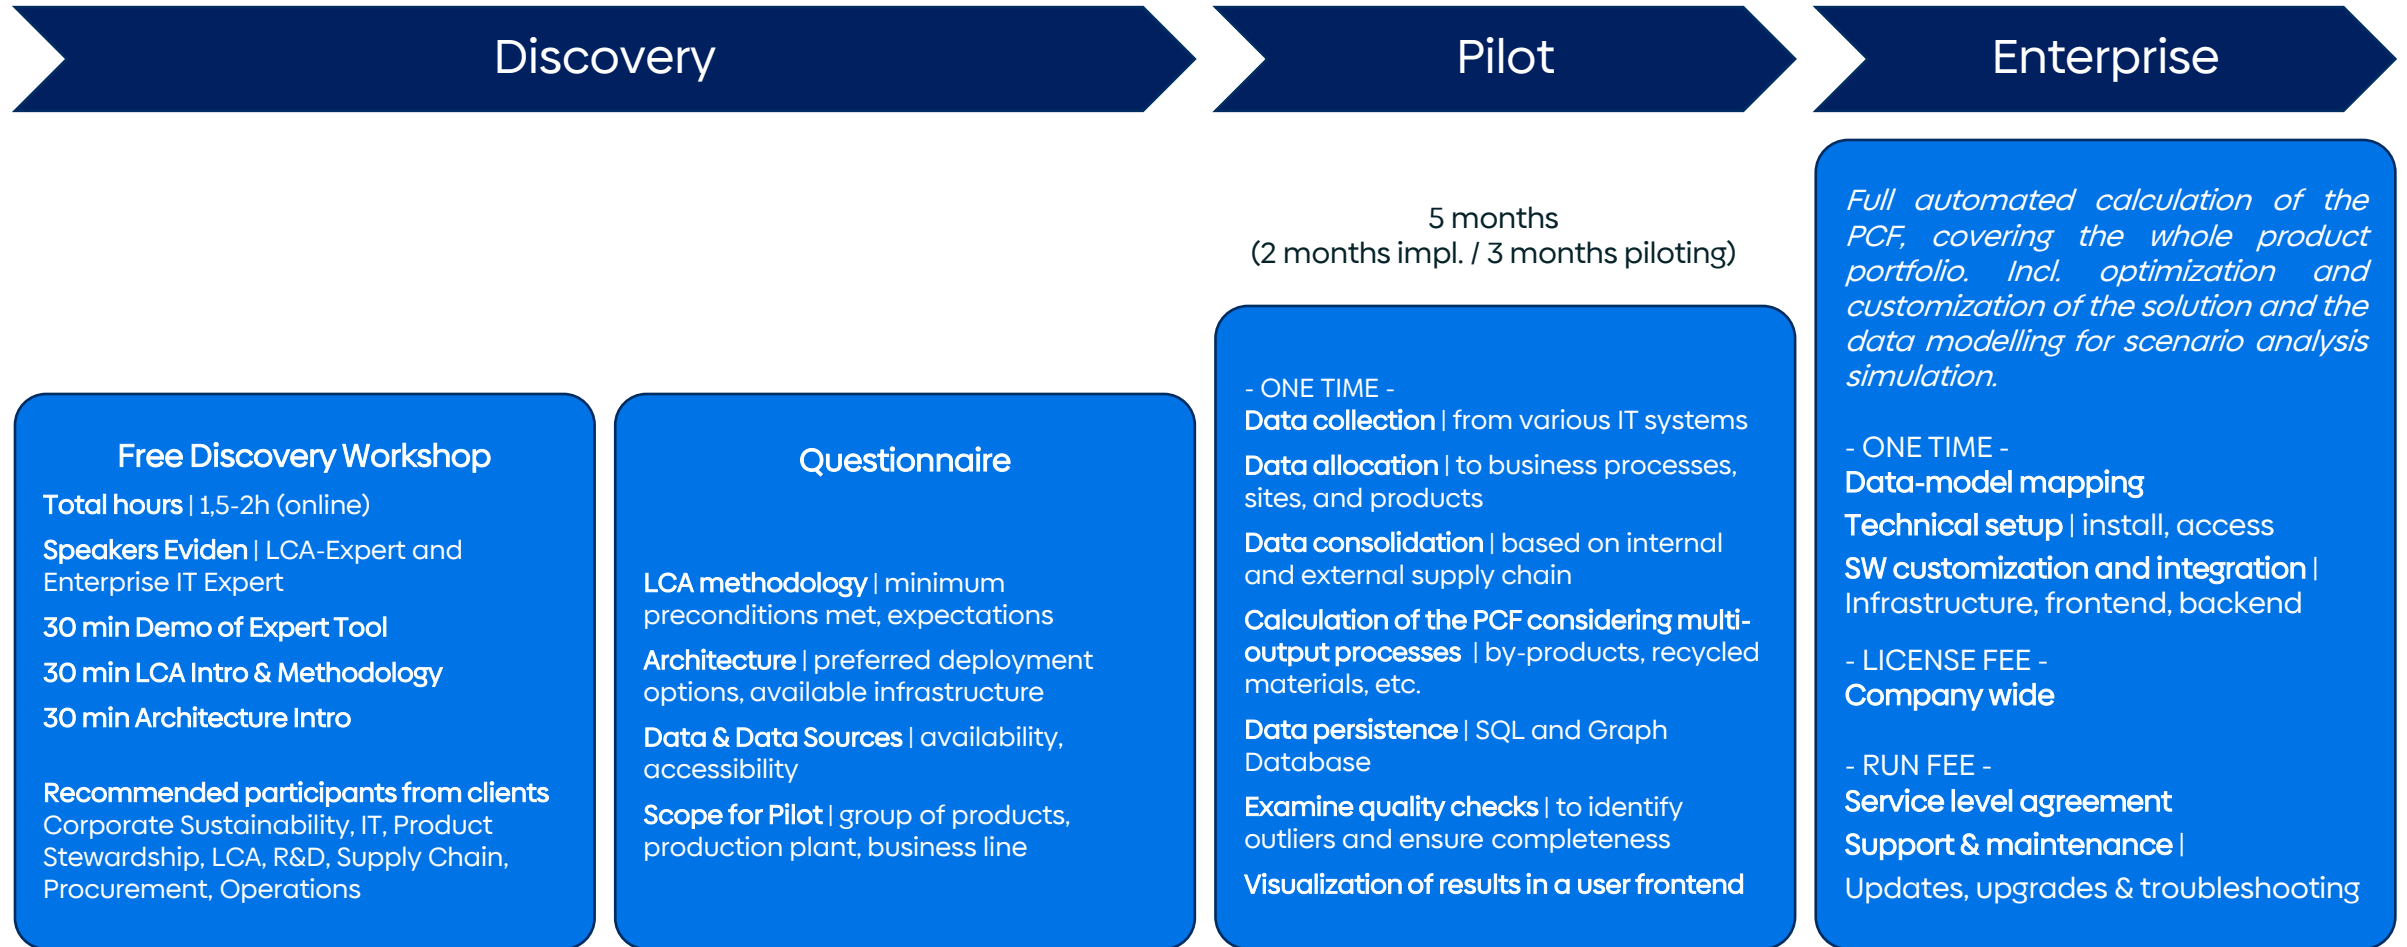

A large, vibrant blue curved shape that starts from the left edge of the frame and curves upwards and to the right, resembling a stylized 'C' or a partial circle. It is set against a dark blue background.
