

D2P: Accessible PDFs for everyone with just one click

**Documents -
that reach everyone**

In an inclusive society, information should be equally accessible to all people - regardless of physical limitations or technical barriers. Our software allows you to easily convert documents & data into accessible PDF files.

The key to accessibility

Why accessibility standards?

Public bodies and most companies are required by law to store digital content in accordance with accessibility

standards. These standards should enable all people to have equal access to information and services.

The standards:

- **ISO standard 14289-1 (PDF/UA)**
This standard defines the accessibility requirements for PDF documents so that they can be optimally used by assistive technologies such as screen readers.
- **DIN standard (EN) 301 549**
This standard describes the accessibility requirements for ICT products and services. -services and ensures that all users, regardless of their abilities, have access to digital content.

However, accessibility is also a social obligation. It enables all people to have equal access to information, spaces and services and helps to promote social participation.

Our D2P (Data2PDF) product for your requirements

With our product, you ensure that your documents comply with these legal and ethical standards.

efficiently and without any additional effort. Converting Word and PowerPoint documents into accessible PDF files is intuitive and fast.

Our product offers you:

- **Simple operation**
The interface is integrated into Word and PowerPoint in a user-friendly way so that you can create PDF/UA-compliant documents with a single click.
- **Automatic adjustments**
Our software recognizes elements in your documents that are not accessible and suggests improvements.
- **Integration into your IT environment**
Our product can be seamlessly integrated into your IT environment in order to generate PDFs from other programs in accordance with accessibility standards.
- **Reliable quality**
Our generated documents comply with the applicable PDF/UA standards without any post-processing.

AtoS

Our solution for you

Conversion of different document types:
