

## Smarter, more adaptive detections

- AI-driven anomaly and behavioral detection
- Correlation across AI-enabled tools (EDR, XDR, SASE, WAF)

**Value :**

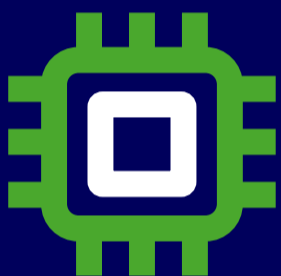

- Broader visibility
- Earlier threat detection.

## Intelligent triage

- AI-based alert scoring
- Business and risk-aware prioritization

**Value :**

- Noise reduction
- Faster response to high-risk alerts

## Natural language AI assistant

- Natural-language search across logs, TI, and documentation
- Faster analyst investigations

**Value :**

- Investigation acceleration
- Consistent analyst decisions

## Virtual SOC Analyst (Agentic AI)

- Automated triage and investigation
- Transparent reports and human handover

**Value :**

- SOC scalability
- Analyst focus on high-value actions
