

Atos Cybersecurity Advisory Services

Board-Level Cybersecurity
Strategy for Resilient Growth

Atos

More confidence. More resilience. More future readiness.

Digital transformation, new regulations, and a dynamic threat landscape are increasing pressure on organizations more than ever before. Decisions must be faster, more informed, and more aligned with business priorities - with a clear understanding of risks and compliance obligations.

Security Advisory provides the strategic foundation to manage this complexity: understanding risks, translating regulatory requirements, setting priorities, and aligning security actions with business objectives.

By taking a holistic view of people, processes, and technology, Security Advisory moves cybersecurity beyond isolated controls. It enables organizations to define target security states, establish effective governance, and make informed investment decisions that support both resilience and growth.

With the right advisory approach, cybersecurity becomes a business enabler - strengthening trust, supporting compliance, and creating the confidence required to innovate securely in an evolving threat landscape.

Cybersecurity today is a leadership and governance mandate: successful organizations integrate risk, governance, compliance, and business ambition into one clear security strategy.

With our Security Advisory services, your organization can:

- **Strengthen resilience** with structured risk assessments and clear prioritization
- **Achieve compliance with confidence**, even as regulations grow more complex
- **Reduce financial, operational, and reputational risks**
- **Enable secure business growth** by aligning cybersecurity with strategic goals.

Expert driven advisory for a complex digital world

Highly connected and regulated environments demand clarity and structure. Weak governance, unclear roles, and isolated security efforts often lead to blind spots and increased exposure. Our Security Advisory Services deliver transparency, strengthen governance, and support sound decision making at executive, managerial, and operational levels.

Our Security Advisory services provide expert led, structured guidance to help organizations understand their risk landscape, interpret regulatory and industry requirements, and establish a solid foundation for effective cybersecurity management.

By combining deep domain expertise, proven methodologies, and industry best practices, we support informed decision making at executive, management, and operational levels. We help align people, processes, and technology to define governance models, security roadmaps, and target states that balance risk, compliance, and business enablement.

Rather than isolated services, we deliver integrated advisory capabilities across three strategic pillars:

- ## 1. Strategic Governance & Leadership

Building executive control and long-term direction

Governance, risk & compliance (GRC)
Establish robust governance and risk management frameworks that embed security across the organization and turn compliance into a strategic advantage.

Security strategy, planning and investment optimization
Define target security levels, prioritize initiatives, and optimize investments through a roadmap aligned to your business objectives.

CISO as a service (CaaS)
Access experienced security leadership to accelerate strategy execution, strengthen governance, and support critical decision making.
- ## 2. Operational & Ecosystem Resilience

Strengthening control across complex environments

Supply chain security
Protect interconnected operations by addressing third party risk and strengthening resilience across your extended ecosystem.

Domain advisory
Tailored guidance across Cloud, Operational Technology (OT), Identity & Access Management (IAM), and data security domains.

Enterprise security dashboard
Enable transparency and accountability with executive level visibility into risk posture, maturity, and progress.
- ## 3. Data & Regulatory Confidence

Protecting value while enabling compliance.

Data governance and protection
Safeguard your most valuable asset through effective data classification, protection strategies, and privacy driven governance.

Enterprise security dashboard
Enable transparency and accountability with executive level visibility into risk posture, maturity, and progress.

Training & Security culture
Develop a security aware culture with role based training programs spanning awareness, technical expertise, and leadership readiness.

A partner connecting strategy with operational security

Effective cybersecurity advisory requires more than frameworks. It requires insight into how threats evolve and how controls operate in real environments.

Atos combines strategic advisory with deep operational cybersecurity expertise. Our advisors work closely with global security operations, threat intelligence specialists, and vulnerability research teams. This connection ensures that strategies are informed by real-world security insights and translate into practical improvements to your security posture.

An integrated advisory approach

Cybersecurity strategy must balance leadership priorities with technical and operational realities. Our advisory model brings together governance expertise, regulatory insight, and deep technical knowledge within one integrated capability.

This approach helps organizations move from assessment to action, with security strategies, governance models, and roadmaps designed for practical implementation and measurable risk reduction.

Proven expertise

Certified CISSP, CISM, OSCP professionals with 20+ years of experience across highly regulated industries. End to end coverage: From risk assessments and strategy definition to governance, compliance, and transformation support.

End to end coverage:

From risk assessments and strategy definition to governance, compliance, and transformation support.

Intelligence driven insights

Powered by threat intelligence, global SOCs, and advanced Atos Security Labs.

Quantifiable outcomes

Clear risk reduction, targeted prioritization, and measurable return on security investment.

Aligned with global standards & regulations

Our advisory services align with leading frameworks and regulatory requirements, including: PCI DSS · ISO/IEC 27001 · GDPR · HIPAA · NIST CSF · MITRE ATT&CK · NIS2 · OWASP · DORA · TIBER EU · CRA

What makes our advisory intelligence-driven

Our advisory services are informed by continuous operational security intelligence and global threat insights. This ensures that recommendations reflect not only best practices, but also the realities of the current threat landscape. Organizations benefit from:

- Continuous integration of threat intelligence insights
- Benchmarking against global incident data
- Risk prioritization based on active attack patterns
- Data-supported justification of security investments.

A trusted partner for your cybersecurity journey

We support you throughout your cybersecurity journey with an integrated approach that combines strategy, governance, technology, and operational security - tailored to your industry and maturity.

Our commitment goes beyond advisory. As part of Atos' end to end cybersecurity portfolio, our advisory services connect seamlessly with security strategy, GRC, identity and access management, cloud and data security, security testing, and managed security services. This integrated approach helps you build resilience, maintain compliance, and innovate securely - every step of the way.

Take advantage of our global expertise in security consulting

Advisors

650+

Multi-certified consultants

Oversight

30+

Jurisdictions monitoring for new regulations worldwide

Fortification

100+

Standards, guidelines and control frameworks

Expertise

20+

Years of experience in cybersecurity

Move from assessment to measurable impact:

- Request a Cyber Maturity Assessment
- Schedule a Strategic Security Consultation
- Book a CISO Advisory Briefing

About Atos

Atos Group is a global leader in digital transformation with c. 56,000 employees and annual revenue of c. €7.2 billion (at the go-forward perimeter), operating in 54 countries under two brands – Atos for services and Eviden for products and systems. European number one in cybersecurity and a leader in cloud, Atos Group is committed to a secure and decarbonized future and provides tailored AI-powered, end-to-end solutions for all industries. Atos Group is the brand under which Atos SE (Societas Europaea) operates. Atos SE listed on Euronext Paris.

The purpose of Atos is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.
