

Atos Recognized as a Tech Innovator in Agentic AI by Gartner®

Paris, France – September 23, 2026. [Atos](#), a global leader in digital transformation powered by Artificial Intelligence, today announced that it has been recognized as a Tech Innovator in Agentic AI in the Gartner® research report “*Emerging Tech: AI Vendor Race: Tech Innovators in Agentic AI - Solution Accelerators*” (24 June 2026). In the report, it is our belief that Gartner® identifies a selected group of vendors advancing the next generation of enterprise AI through innovative approaches designed to help organizations move from experimentation to production-scale autonomous operations.

Gartner® notes agentic systems fail in real-world deployments not due to product flaws but due to human process gaps and operational friction. To scale revenue, product leaders must prioritize critical orchestration capabilities that bridge the gap between demos and production to become indispensable to customers.

Atos thinks its Atos Polaris Ai Platform is the ideal solution to deliver end-to-end, secure and sovereign agentic AI solutions while eliminating infrastructure complexity. Benefiting in addition from a curated ecosystem of partners, ranging from hyperscalers to open-source technology providers, Atos is convinced it is in a position to accelerate customers’ agentic AI adoption across the entire AI lifecycle, from process transformation and workforce augmentation to change management, model training and security.

Atos believes this approach is fully aligned with its three strategic growth pillars — Agentic AI, Digital Sovereignty and Cybersecurity — enabling the delivery of trusted autonomous systems for regulated and mission-critical environments.

*“We believe being recognized by Gartner® as a Tech Innovator in Agentic AI underscores Atos’ commitment to helping organizations move beyond experimentation and into secure, scalable, production-ready Agentic AI” said **Jennifer Ferrara, global head of Agentic AI Transformation at Atos.** “As enterprises seek to unlock business value from autonomous AI systems, they need trusted partners capable of combining technology innovation, governance, cybersecurity and digital sovereignty. We believe this recognition validates Atos’ unique approach to delivering these capabilities at scale.”*

Recent Atos Innovations in Agentic AI

Atos believes that this recognition follows a series of significant investments and product launches demonstrating Atos' commitment to becoming a global leader in Agentic AI.

- **Atos Polaris AI Platform**

Launched in 2025, the Atos Polaris AI Platform provides a unified ecosystem for Generative AI and Agentic AI, combining orchestration, enterprise knowledge management, business process transformation and software engineering capabilities. The platform is a comprehensive system of AI agents leveraging multiple large language models and cloud environments, capable of autonomously orchestrating complex business workflows while providing AgentOps capabilities for governance, compliance, performance and cost management.

The Atos Polaris platform includes a no-code Agent Studio enabling organizations to design, orchestrate and integrate multiple AI agents. The studio supports open standards including Model Context Protocol (MCP) and Agent-to-Agent (A2A) communication, allowing enterprises to build interoperable agent ecosystems.

- **Expanded strategic collaboration with Microsoft**

In June 2026, Atos Group and Microsoft announced an expanded strategic collaboration to scale secure Agentic AI across Atos and its global client ecosystem. Through this collaboration, Microsoft Copilot Studio and Azure AI Foundry are becoming part of Atos' Sovereign Agentic AI Studios, designed to help customers safely bring AI agents into production environments.

The collaboration supports Atos' ambition to help its customers accelerate their AI transformations using proven deployment frameworks, governance models and enterprise-grade security capabilities.

- **Atos MogwAI**

In July this year, Atos announced the launch of Atos MogwAI in France, its sovereign generative and agentic AI platform. Designed to support large-scale enterprise adoption of AI, Atos MogwAI provides an end-to-end platform spanning infrastructure, AI deployment, integration and governance, enabling organizations to leverage their data, documents and business processes within a secure, controlled and sovereign framework.

Meet Atos in Barcelona at the Gartner IT Symposium/Xpo™ 2026, November 9-12, 2026

Join us at one of the world's most important gatherings of CIOs and IT Executives to separate hype from reality. Get practical solutions to accelerate your organization's technology strategy to adapt and withstand disruptions.

Florin Rotar, CTO, Atos Group, as well as other Atos top executives will participate and share their vision and experience during speaking sessions and will be available for exclusive interviews with members of the press. Please contact us for more information.

About Atos

[Atos](#) is Atos Group's brand dedicated to end-to-end, secure and AI-accelerated digital services. Atos designs, develops and operates digital environments that are critical to performance, resilience and sovereignty. The company helps public and private organizations around the world maintain control of their data and infrastructure, while meeting their compliance requirements.

With more than 52,000 employees serving more than 4,500 customers in 54 countries, Atos supports the modernization of IT systems, accelerates cloud and data transformation, strengthens cybersecurity and deploys secure digital workplaces for the benefit of its customers, their employees and society. Atos also offers consulting and support services through its Atos Amplify brand.

As a trusted partner in the management of complex and critical environments, Atos supports organizations in highly regulated and sovereign contexts.

About Atos Group

[Atos Group](#) is a global leader in digital transformation with nearly 54,000 employees and annual revenues of nearly €7.2 billion. With a commercial presence in 54 countries, it operates under two brands: Atos for services and Eviden for products and systems. As the European leader in cybersecurity and a leader in the cloud sector, Atos Group is committed to a secure and decarbonized future. It offers tailor-made and integrated solutions, accelerated by AI, for all sectors of activity. Atos Group is listed on Euronext Paris.
